INDUSTRY SOLUTION

Car Dealerships

A dealership floor is full of high-value assets, vehicles, equipment, and customer data, that require cameras and access control that simply cannot fail. We design and manage surveillance and access systems built for large open lots, showrooms, and service bays, with AI-powered detection that keeps eyes on what matters most.

Monitoring & support

The Challenge for Car Dealerships

Vehicles, parts, and equipment sit out in the open across a large lot, showroom, and service bays, all of it a target for theft and vandalism. Generic camera systems built for offices don't hold up over acres of open lot, and when a system misses something, it's inventory or liability on the line.

What We Deliver

AI-Powered Camera Detection
Cameras that flag people, vehicles, and unusual activity, not just record footage.

License Plate Recognition
Automatic tracking of vehicles moving on and off the lot, day or night.

Access Control
Keyless entry for showrooms, service bays, and parts storage, with full activity logs.

Lot-Wide Network & WiFi
Reliable connectivity across the showroom, service bays, and open lot.

Structured Cabling
Clean, labeled, standards-based copper and fiber, documented from day one.

24/7 Monitoring
We watch the system continuously, so incidents get caught as they happen, not after.

Why It Works

Instead of cameras that just record and hope nobody has to review the footage, AI-powered detection watches your lot, showroom, and service bays as one system and flags what actually matters. You get eyes on your inventory around the clock, without staff having to watch a wall of monitors.

How It Works

1. **We assess the property**
   A walkthrough of the lot, showroom, service bays, and existing camera coverage.

2. **We design a full-coverage system**
   Cameras, access control, and network, laid out to eliminate blind spots across the property.

3. **We install with minimal disruption**
   Work is scheduled around business hours, so sales and service keep running.

4. **We manage everything ongoing**
   Monitoring, support, and updates are on us. You don't chase vendors or troubleshoot.

Built to Own, Not Rent

Our infrastructure runs on a perpetual license model. You own the system outright and pay us for management, not for the hardware's right to keep functioning. No annual software licensing fees and no per-device subscriptions layered on top.

A Simple Monthly Model

- Predictable monthly pricing built around your lot size and camera count
- AI-powered detection and license plate recognition included, not an upsell
- No large upfront cost; purchase equipment outright or lease it at a low monthly rate
- Scales with you as you add lots or locations

Who This Is For

New Car Dealerships

Used Car Lots

Multi-Location Dealer Groups

Auto Service Centers

Powersports & RV Dealers

Equipment & Fleet Yards
