INDUSTRY SOLUTION

Churches & Religious Campuses

Multi-building campuses, shared spaces, and limited budgets require a thoughtful approach. We design systems that are simple to manage and built to serve your community long-term.

1
Partner for network, security & AV

Systems only your volunteer IT person understands

24/7
Monitoring & support

The Challenge for Churches & Religious Campuses

Most campuses include a church, offices, a school or hall, and shared spaces used by many different ministries and groups, often with a tight budget and no dedicated IT staff. Equipment gets added over the years without a real plan, and when something breaks, it usually falls on a volunteer to sort out.

What We Deliver

Campus-Wide WiFi
Reliable coverage across the church, offices, hall, and shared spaces.

Access Control
Keyless entry across buildings, so staff and volunteers aren't managing keys.

Security Camera Systems
Indoor and outdoor coverage with remote viewing, alerts, and secure recording.

Audio-Visual & Livestream
Sound, displays, and livestream support for services and events, built to just work.

Structured Cabling
Clean, labeled, standards-based copper and fiber, documented from day one.

24/7 Monitoring
We watch the system continuously, so issues get caught before your next service or event.

Why It Works

Instead of a patchwork of equipment only one volunteer understands, we build one simple system for the whole campus, sized to your budget. Your staff gets a single partner to call, not another thing to manage.

How It Works

1. **We assess the campus**
   A walkthrough of buildings, shared spaces, and existing infrastructure across the campus.

2. **We design a system that fits your budget**
   Network, WiFi, cameras, access control, and AV, sized to what your community actually needs.

3. **We install around your schedule**
   Work is planned around services and events, so nothing is disrupted.

4. **We manage everything ongoing**
   Monitoring, support, and updates are on us, not on a volunteer.

Built to Own, Not Rent

Our infrastructure runs on a perpetual license model. You own the system outright and pay us for management, not for the hardware's right to keep functioning. No annual software licensing fees and no per-device subscriptions layered on top.

A Simple Monthly Model

- Predictable monthly pricing built around your campus size and budget
- No need to rely on a volunteer to keep systems running
- No large upfront cost; purchase equipment outright or lease it at a low monthly rate
- Scales with you as the campus grows or adds buildings

Who This Is For

Parishes & Congregations

Multi-Campus Churches

Religious Schools

Monasteries & Convents

Community & Fellowship Centers

Faith-Based Nonprofits
