INDUSTRY SOLUTION

Commercial Real Estate & Property Management

Managing technology across a multi-tenant property is complex. Different tenants, shared infrastructure, and no clear ownership. We replace the patchwork with one clean, managed system that covers the entire building.

Monitoring & support

The Problem in Multi-Tenant Buildings

Every tenant installing their own internet, cabling, and equipment leaves you with holes in the walls, competing providers, and no consistency from unit to unit. When something breaks, nobody owns it, and small issues turn into daily headaches for you and your tenants.

What We Deliver

Private Tenant Networks
Each tenant gets a secure, isolated network on shared building infrastructure.

Building-Wide WiFi
Reliable, professionally tuned wireless coverage across every floor and common area.

Security Camera Systems
Indoor and outdoor coverage with remote viewing, alerts, and secure local recording.

Access Control
Keyless entry with user-based permissions and full activity logs, managed remotely.

Structured Cabling
Clean, labeled, standards-based copper and fiber, documented from day one.

24/7 Monitoring
We watch the system continuously, so issues get caught before tenants notice.

Why It Works

Instead of every tenant installing their own service, we build one clean, managed system for the entire property. Tenants move in and out without new cabling or setup, and you keep one number to call for everything.

How It Works

1. **We assess the property**
   A walkthrough of existing infrastructure, wiring, and tenant needs across the building.

2. **We design a tailored system**
   Network, WiFi, cameras, and access control, sized to your building and budget.

3. **We install with minimal disruption**
   Work happens in common areas, ceilings, and utility spaces without interrupting tenants.

4. **We manage everything ongoing**
   Monitoring, support, and updates are on us. You don't chase vendors or troubleshoot.

Built to Own, Not Rent

Our infrastructure runs on a perpetual license model. You own the system outright and pay us for management, not for the hardware's right to keep functioning. No annual software licensing fees and no per-device subscriptions layered on top.

A Simple Monthly Model

- Predictable monthly pricing based on building size and system needs
- No large upfront cost; purchase equipment outright or lease it at a low monthly rate
- New tenants activate quickly, with no new cabling or setup required
- Scales with you as the building grows or gains tenants

Who This Is For

Multi-Tenant Office Buildings

Mixed-Use Properties

Medical Office Buildings

Small Business Plazas & Strip Malls

Apartment & Residential Buildings

Co-Working & Flexible Spaces
