INDUSTRY SOLUTION

Healthcare Clinics & Practices

Medical environments need reliable connectivity, secure networks, and systems that don't go down. We design and deploy infrastructure built for uptime, with proper network segmentation to keep patient and operational systems separate.

Monitoring & support

The Challenge in Medical Environments

In a clinical setting, a network outage doesn't just slow things down, it can disrupt patient care. Many practices have guest WiFi, medical devices, and office systems all running on the same network, creating both reliability and security risks. Most general IT providers aren't designed to handle these unique needs.

What We Deliver

Network Segmentation
Patient WiFi, clinical devices, and admin systems isolated on separate, secure networks.

Redundant Connectivity
Backup internet and automatic failover, so the practice stays online if one connection drops.

Security Camera Systems
Indoor and outdoor coverage with remote viewing, alerts, and secure local recording.

Access Control
Keyless entry for exam rooms, records, and staff areas, with full activity logs.

Structured Cabling
Clean, labeled, standards-based copper and fiber, documented from day one.

24/7 Monitoring
We watch the system continuously, so issues get caught before they affect patient care.

Why It Works

Instead of one flat network carrying everything, we build a segmented environment where patient and guest traffic never touches clinical or administrative systems. Everything still runs under one managed system, with one number to call.

How It Works

1. **We assess the practice**
   A walkthrough of existing infrastructure, devices, and workflow across the practice.

2. **We design a segmented system**
   Network, WiFi, cameras, and access control, built around uptime and separation of systems.

3. **We install with minimal disruption**
   Work is scheduled around patient hours, so care isn't interrupted.

4. **We manage everything ongoing**
   Monitoring, support, and updates are on us. You don't chase vendors or troubleshoot.

Built to Own, Not Rent

Our infrastructure runs on a perpetual license model. You own the system outright and pay us for management, not for the hardware's right to keep functioning. No annual software licensing fees and no per-device subscriptions layered on top.

A Simple Monthly Model

- Predictable monthly pricing built around your practice's size and systems
- Enterprise-level support and design attention, regardless of practice size
- No large upfront cost; purchase equipment outright or lease it at a low monthly rate
- Scales with you as the practice grows or adds locations

Who This Is For

- **Medical Office Buildings**
- **Dental Practices**
- **Outpatient Clinics**
- **Specialty Medical Practices**
- **Urgent Care Centers**
- **Multi-Location Practice Groups**
