INDUSTRY SOLUTION

Professional Services Firms

Law firms, accounting practices, and consultancies handle sensitive client data and can't afford downtime or security gaps. We configure and manage your Microsoft 365 or Google Workspace environment and the network underneath it.

1
Partner for network & workplace tools

Permissions and logins nobody's tracking

24/7
Monitoring & support

The Challenge for Professional Services Firms

Client data, contracts, and financial records all live in your email and cloud tools, and a breach or an outage costs you more than time. Most IT providers manage the network or the workplace tools, but not both, which leaves gaps at exactly the point where security matters most.

What We Deliver

Microsoft 365 & Google Workspace
User provisioning, permissions, and policies, managed and kept organized.

Email & Identity Security
Layered protection for email, identity, and applications against phishing and account takeover.

Business-Grade Network & WiFi
Reliable, secure connectivity across the office, built for how your firm works.

Cloud Identity & Access
Centralized sign-in and permissions, so access is easy for staff and simple for you to manage.

Structured Cabling
Clean, labeled, standards-based copper and fiber, documented from day one.

24/7 Monitoring
We watch the system continuously, so issues get caught before they touch client work.

Why It Works

Instead of one vendor for your network and another for Microsoft 365 or Google Workspace, we manage both together, so nothing falls in the gap between them. One partner, one number to call, and a security posture that actually holds together.

How It Works

1. **We assess the firm**
   A review of your current network, cloud environment, and how staff actually work.

2. **We design a secure environment**
   Network, WiFi, and your Microsoft 365 or Google Workspace setup, aligned and locked down.

3. **We implement with minimal disruption**
   Changes are scheduled around your workday, so client work isn't interrupted.

4. **We manage everything ongoing**
   Monitoring, support, and updates are on us. You don't chase vendors or troubleshoot.

Built to Own, Not Rent

Our network infrastructure runs on a perpetual license model. You own the hardware outright and pay us for management, not for its right to keep functioning. No annual software licensing fees and no per-device subscriptions layered on top.

A Simple Monthly Model

- Predictable monthly pricing built around your firm's size and systems
- One partner for network, security, and workplace tools
- No large upfront cost; purchase equipment outright or lease it at a low monthly rate
- Scales with you as the firm adds staff or locations

Who This Is For

Law Firms

Accounting & CPA Firms

Consultancies

Financial Advisory Firms

Insurance Agencies

Marketing & Creative Agencies
