24/7
Monitoring & support

The Challenge with DIY Workplace Setups

Most Microsoft 365 or Google Workspace environments were set up years ago by whoever was around at the time, and never really revisited. Permissions pile up, former employees keep access longer than they should, and nobody's sure who can see what until something goes wrong.

What We Deliver

Microsoft 365 & Google Workspace Setup
Proper configuration of users, groups, and policies from the ground up.

Permission & Access Cleanup
An audit of who has access to what, with anything outdated removed.

Email & Identity Security
Layered protection against phishing, account takeover, and unauthorized access.

Cloud Identity & Access
Centralized sign-in, so access is simple for staff and easy for you to manage.

License & Account Cleanup
Unused licenses and forgotten accounts identified and removed.

Ongoing Management
Kept organized and secure as new people join and the team grows.

Why It Works

Instead of leaving your workplace tools running on whatever setup got you started, we configure and lock down the environment properly, then keep it that way. Onboarding and offboarding become routine instead of a scramble.

How It Works

1. **We audit your current environment**
   A full review of users, permissions, licenses, and security settings.

2. **We clean up and reconfigure**
   Permissions, policies, and accounts brought up to a real standard.

3. **We roll out changes with minimal disruption**
   Updates are staged so your team keeps working without interruption.

4. **We manage it ongoing**
   New hires, departures, and permissions handled as part of the plan.

Built to Own, Not Rent

Our network infrastructure runs on a perpetual license model. You own the hardware outright and pay us for management, not for its right to keep functioning. No annual software licensing fees and no per-device subscriptions layered on top.

A Simple Monthly Model

- Predictable monthly pricing built around your team size and tools
- 24/7 monitoring and support included in every plan
- No large upfront cost; purchase equipment outright or finance it at a low monthly rate
- Scales with you as your team grows or adds new tools

This Fits If You're

Never Revisited Your Original Setup

Not Sure Who Has Access to What

Onboarding & Offboarding Informally

Worried About Phishing or Security Gaps
