USE CASE

New Building Build-Out

Opening a new space? We get involved early, coordinating cabling, network design, WiFi, cameras, and access control alongside your contractors so everything is ready on day one.

1
Partner from planning through go-live

0
Scrambling on move-in day

Day 1
Fully operational, on schedule

The Challenge with New Build-Outs

Technology is usually the last thing anyone thinks about during a build-out, and the first thing that causes problems on move-in day. Cabling gets rushed, WiFi gets an afterthought, and by the time someone calls about network or security, contractors are already closing up walls.

What We Deliver

Structured Cabling
Copper and fiber planned and installed alongside the build, not after it.

Network Design & WiFi
A network built for how the space will actually be used, live from day one.

Security Camera Systems
Cameras planned into the layout, not bolted on after the fact.

Access Control
Keyless entry wired in during construction, ready before the doors open.

Contractor Coordination
We work directly with your GC and other vendors, so timelines stay aligned.

24/7 Monitoring
Once you're live, we keep watching, so issues get caught before they slow you down.

Why It Works

We get involved during construction, not after it, so cabling, network, and security are built into the space instead of retrofitted around it. You open on schedule, with everything already working.

How It Works

1. **We join the project early**
   We review plans and walk the space alongside your architect or contractor.

2. **We design around the build**
   Cabling, network, cameras, and access control, laid out to match the construction timeline.

3. **We install alongside your contractors**
   Work is coordinated with the build schedule, not squeezed in after the fact.

4. **We manage everything after move-in**
   Monitoring, support, and updates are on us from day one of operation.

Built to Own, Not Rent

Our infrastructure runs on a perpetual license model. You own the system outright and pay us for management, not for the hardware's right to keep functioning. No annual software licensing fees and no per-device subscriptions layered on top.

A Simple Monthly Model

- Predictable monthly pricing built around the finished space, not guesswork
- 24/7 monitoring and support included in every plan
- One partner from construction through day-to-day operation
- No large upfront cost; purchase equipment outright or finance it at a low monthly rate
- Scales with you if you build out additional space later

This Fits If You're

Opening a New Office

Building Out a Retail Space

Expanding to a Second Location

Constructing a New Medical Facility

Adding a Building to Your Campus

Fitting Out a New Warehouse
