USE CASE

No In-House IT Team

No dedicated IT person? We act as your technology partner, advising on decisions, managing vendors, and executing projects so you're not figuring it out alone.

1
Partner for every technology decision

0
Need to hire a full-time IT person

24/7
Monitoring & support

The Challenge with No In-House IT

Without someone dedicated to technology, decisions get made reactively, vendors go unmanaged, and projects stall because no one owns them. It usually falls to whoever's "good with computers," and expensive mistakes happen without anyone to catch them.

What We Deliver

Technology Strategy & Advising
A partner to think through decisions with, before you commit budget to them.

Vendor Management
We coordinate ISPs, contractors, and other vendors, so you don't have to.

Project Management & Delivery
From planning to go-live, someone owns the outcome, not just a task list.

Network & Security Management
Your infrastructure, monitored and maintained without you needing to ask.

Workplace Tools Administration
Microsoft 365 or Google Workspace, configured and kept organized.

24/7 Monitoring
We watch the systems continuously, so issues get caught before they become problems.

Why It Works

Instead of figuring out technology decisions alone or hoping a generalist vendor gets it right, you get a dedicated partner who advises, manages, and executes for you. It's the judgment of an in-house IT lead, without the full-time hire.

How It Works

1. **We learn your business**
   A review of your current setup, tools, vendors, and where things tend to break down.

2. **We become your technology advisor**
   You get a partner to bring decisions to, before money gets spent on the wrong thing.

3. **We manage vendors and execute projects**
   We coordinate the moving parts and see projects through to completion.

4. **We handle everything day to day**
   Monitoring, support, and updates are on us. You don't chase vendors or troubleshoot.

Built to Own, Not Rent

Our infrastructure runs on a perpetual license model. You own the system outright and pay us for management, not for the hardware's right to keep functioning. No annual software licensing fees and no per-device subscriptions layered on top.

A Simple Monthly Model

- Predictable monthly pricing that replaces the cost of a full-time hire
- 24/7 monitoring and support included in every plan
- No large upfront cost; purchase equipment outright or finance it at a low monthly rate
- Scales with you as the business and its technology needs grow

This Fits If You're

Running a Business with No IT Person

Relying on Whoever's "Good with Computers"

Making Tech Decisions Without Guidance

Juggling Vendors with No Clear Owner

Outgrowing a Part-Time Fix

Tired of Technology Surprises
