USE CASE

Opening a Second Location

Expanding to a new site means replicating what works, consistently. We manage multi-location buildouts as one coordinated project so every site looks and runs the same way.

1
Partner across every location

0
Inconsistencies between sites

24/7
Monitoring & support

The Challenge with Opening a Second Location

Replicating what works at your first location is harder than it sounds. Without a coordinated plan, the new site ends up with different vendors, inconsistent security, and no shared visibility, so it never quite feels like the same business.

What We Deliver

Standardized Network Design
The same reliable setup, replicated at every location you open.

Centralized Monitoring
One dashboard and one partner across every site, not a new vendor each time.

Security Camera Systems
Indoor and outdoor coverage with remote viewing, alerts, and secure recording.

Access Control
Keyless entry with the same permissions structure at every site.

Structured Cabling
Clean, labeled, standards-based copper and fiber, documented from day one.

Contractor Coordination
We work directly with your GC and vendors, so the new site opens on time.

Why It Works

Instead of treating every new location as its own one-off project, we replicate a proven design across each site. You get the same reliability, the same security, and the same partner, no matter how many locations you add.

How It Works

1. **We review what works at your first site**
   A look at your current network, security, and systems as the standard to replicate.

2. **We design to match your standard**
   Cabling, network, cameras, and access control, built the same way at the new site.

3. **We install alongside your contractors**
   Work is coordinated with the build timeline, so the new site opens on schedule.

4. **We manage every location under one system**
   Monitoring, support, and updates are on us, across all your sites.

Built to Own, Not Rent

Our infrastructure runs on a perpetual license model. You own the system outright and pay us for management, not for the hardware's right to keep functioning. No annual software licensing fees and no per-device subscriptions layered on top.

A Simple Monthly Model

- Predictable monthly pricing that scales cleanly across locations
- 24/7 monitoring and support included in every plan
- No large upfront cost; purchase equipment outright or finance it at a low monthly rate
- One partner as you add a third, fourth, or fifth location

This Fits If You're

Opening a Second Office

Expanding Your Retail Footprint

Growing a Multi-Location Practice
