USE CASE

Protecting High-Value Assets

When the cost of a security failure is measured in stolen inventory, unauthorized access, or missed incidents, your camera and access control systems need to be bulletproof. We design and manage systems with AI-powered detection, license plate recognition, and around-the-clock monitoring, so nothing slips through.

The Challenge with Protecting High-Value Assets

Inventory, equipment, and access points are often spread across a facility in ways generic security systems weren't built to cover. Cameras that just record and access logs nobody reviews don't stop a loss, they just document it after the fact, when it's already too late to act.

What We Deliver

AI-Powered Camera Detection
Cameras that flag people, vehicles, and unusual activity, not just record footage.

License Plate Recognition
Automatic tracking of vehicles moving on and off the property, day or night.

Access Control
Keyless entry restricting sensitive areas, with full activity logs.

Facility-Wide Coverage
Cameras and network covering the entire property, not just the entrances.

Structured Cabling
Clean, labeled, standards-based copper and fiber, documented from day one.

24/7 Monitoring
We watch the system continuously, so incidents get caught as they happen, not after.

Why It Works

Instead of cameras that just record and hope nobody has to review the footage, AI-powered detection watches your property as one system and flags what actually matters. You get eyes on your assets around the clock, without staff having to watch a wall of monitors.

How It Works

1. **We assess the facility**
   A walkthrough of the property, storage areas, and existing camera coverage.

2. **We design a full-coverage system**
   Cameras, access control, and network, laid out to eliminate blind spots.

3. **We install with minimal disruption**
   Work is scheduled around operations, so nothing slows down.

4. **We manage everything ongoing**
   Monitoring, support, and updates are on us. You don't chase vendors or troubleshoot.

Built to Own, Not Rent

Our infrastructure runs on a perpetual license model. You own the system outright and pay us for management, not for the hardware's right to keep functioning. No annual software licensing fees and no per-device subscriptions layered on top.

A Simple Monthly Model

- Predictable monthly pricing built around your property size and camera count
- AI-powered detection and license plate recognition included, not an upsell
- No large upfront cost; purchase equipment outright or finance it at a low monthly rate
- Scales with you as you add coverage or locations

This Fits If You're

Storing High-Value Inventory or Equipment

Managing a Warehouse or Distribution Yard

Running a Facility with Restricted Areas

Dealing with Theft or Unauthorized Access

Needing Proof After an Incident

Wanting Eyes on Your Property Around the Clock
